

I am sure by now that you have all heard nearly every argument which reason could produce as to why you should abandon this obscene collection of proposed gun control legislation. Sadly, I know that for some, it would not matter if all the logic and good sense in the world were conveyed to you, because you have already chosen to betray your constituents. My appeal is to those who have not yet decided what to do. To the rest of you, I have a very different message.

To those of you still on the fence: consider carefully what passing this legislation will mean for the future of our children. When your child fails a mandatory mental health screening in school because he doesn't agree with some tenet of government propaganda that is being programmed into the minds of our youth, will you be able to accept that he will be forced to take drugs to make him safe for society? Is it so hard to believe that a government with the power to define "sanity," will also be able to administer drugs or whatever other "therapies" it deems necessary in order to "treat" affected individuals?

Without the Second Amendment, you will no longer be a citizen, but a subject. You will have no recourse, but will watch in silent (induced by the death of free speech) horror as every right you had as a parent is absorbed by the state. The institution of family is really the battleground on which we are fighting, and the enemy desperately wants to usurp its role in our society. They're just hoping we're all too distracted with the demands of everyday life to wake up before they make this dystopian nightmare a reality.

For those of you who have in any way contributed to the creation of this diabolical filth, I consider your actions an assault against the free people of the State of Connecticut. As such, I shall respond by doing everything in my power to ensure that not a single one of you ever holds a public office, or any position of even marginal influence, ever again. The fact that you have dared to draft such an obvious attack on our freedom, convinces me that you are unfit to remain in your position. You have chosen to ignore that your role is to serve the public; not your own interests or those of your party. The people you represent deserve better than to be governed by reprobate minds. Because you lack the discernment and virtue required for leadership, I WILL see you displaced, even if I have to run for office myself.

I think by now it is clear that this legislation is nothing more than a barely veiled attempt at the ultimate goal of total citizen disarmament. The most stomach-turning part of it all is that this agenda has been held in calculation, until the opportunity to harness a tragedy and its resultant emotion was perceived. The boldness of this hubris is deepened still by the blatantly false claim that the motivation behind this is to promote public safety. Gun registries are for one thing only, a list of all the guns so that WHEN, not IF, the government comes to take them away, they don't miss any. Remember that the SS were policemen. Being a military or other authority figure doesn't magically render one righteous. Whether this legislation passes or not, you will be remembered for how you voted. I for one will make it my personal mission to ensure that not a single person who voted to infringe on my rights ever gets the chance to do so again.
